ABSTRACT - These instructions give you the basic guidelines for preparing papers for ICMS2020 conference proceedings.

KEYWORDS - List key index terms here. No more than 5.

I. INTRODUCTION

Your goal is to simulate the usual appearance of papers in *ICMS2020 conference proceedings*. For items not addressed in these instructions, please ask your conference Publications Chair for instructions.

A. Preparing Your Paper

1) *Type Sizes and Typefaces*: Follow the font type sizes specified in Table I. The font type sizes are given in points, same as in the MS Word font size points. Times New Roman is the preferred font.

TABLE I
TYPE SIZE FOR PAPERS

| Type size (pts.) | Appearance | | |
|------------------|--|-----------------------|------------|
| | Regular | Bold | Italic |
| 6 | Table superscripts | | |
| 8 | Section titles ^a , references, tables, table names ^a , table captions, figure captions, footnotes, text subscripts, and superscripts | | |
| 9 | | Abstract, Index Terms | |
| 10 | Authors' affiliations, main text, equations, first letter in section titles ^a | | Subheading |
| 11 | Authors' names | | |
| 22 | Paper title | | |

II. METHOD

A. Figures and Tables

Try to position figures and tables at the tops and bottoms of columns and avoid placing them in the middle of columns. Avoid placing figures and tables before their first mention in the text. Use the abbreviation "Fig. #," even at the beginning of a sentence.

Fig. 1 Magnetization as a function of applied field.

Note how the caption is centered in the column.

B. References

Papers that have not been published, even if they have been submitted for publication, should be cited as “unpublished” (Author, 1999). Papers that have been accepted for publication should be cited as “in press” (Author, 1986). In a paper title, capitalize the first word and all other words except for conjunctions, prepositions less than seven letters, and prepositional phrases.

For papers published in translated journals, first give the English citation, then the original foreign-language one.

C. Equations

Number equations consecutively with equation numbers in parentheses flush with the right margin, as in (1). To make your equations more compact, you may use the solidus (/) and the exp function, etc. Italicize Roman symbols for quantities and variables, but not Greek symbols. Use an en dash (–) rather than a hyphen for a minus sign. Use parentheses to avoid ambiguities in denominators. Punctuate equations with commas or periods when they are part of a sentence, as in

$$\frac{e^{ix}}{2} = \frac{\cos x + i \sin x}{2} \Rightarrow \exp(ix)/2 = (\cos x + i \sin x)/2. \quad (1)$$

III. RESULTS

Symbols in your equation should be defined before the equation appears or immediately following. Cite equations using “(1),” not Eq. (1)” or “equation (1),” except at the beginning of a sentence: “Equation (1) is ...”

IV. CONCLUSION AND DISCUSSION

Be aware of the different meanings of the homophones “affect” and “effect,” “complement” and “compliment,” “discreet” and “discrete,” “principal” and “principle.” Do not confuse “imply” and “infer.” The prefix “non” is not a word; it should be joined to the word it modifies, usually without a hyphen. There is no period after the “et” in the Latin abbreviation “et al.” The abbreviation “i.e.” means “that is,” and the abbreviation “e.g.” means “for example.” An excellent style manual for science writers is (Author, 1995, April).

ACKNOWLEDGMENT

The preferred spelling of the word “acknowledgment” in America is without an “e” after the “g.” Try to avoid the stilted expression, “One of us (R. B. G.) thanks ...” Instead, try “R.B.G. thanks ...” Put sponsor acknowledgments in the unnumbered footnote on the first page.
